

QUERY & RESULTS HISTORY

LEVEL UP

LEVEL UP: Query & Results History

TOPIC INTRODUCTION

This Level Up module takes you on a tour of the History area of the WebUI, introduces the information available there, and demonstrates some of the functionality you might find useful.

To benefit from this **Level Up** Topic we suggest the following:

1. Read the guidance questions to focus your attention.
2. View the video provided as a resource.
3. Take the quiz.
4. Repeat as necessary.

LEVEL UP: Query & Results History

GUIDANCE QUESTIONS

- 1) Where (in the WebUI) do I go to view recent query results and query profile information?
- 2) How far in the past am I able to view query profiles and results using the WebUI?
- 3) Can I view my co-worker's queries?
- 4) Can I view the queries run by my company's ETL tool that connects using JDBC?
- 5) Can I download query results from this morning without having to run the query again?
- 6) Can I download the results of my coworker's query from this morning?
- 7) I need to quickly look at this week's queries but only for a particular warehouse, and I want to visually compare queuing time for each query, can I do this from the WebUI?
